Topics of Sessions

Day 1

- **Shaping Future Green Energy Market :
Solar Power Perspective**

This Session will describe the current big demand for the Green Renewable Energy Sources such as Solar, Wind, Hydro and Bio. On this session speakers will be focused on Solar Power and how it can possible impact to the Future Use of Energy. Solar energy is the technology used to harness the sun's energy and make it useable.

- **Sourcing of Solar Power Energy**

This Session will cover sourcing the energy by Solar (Sun) Power. In this sessions speakers from European Union and Third Party Countries will discuss the possible co-operation line in order to support the growth of Solar Energy.

- **Solar Emerging Markets Programmes**

This session is designed to cover Emerging Markets such as Africa countries, China, India, Japan and etc. EU global programmes such as the Africa-EU Renewable Energy Cooperation Programme (RECP) which is a multi-donor programme that supports the development of markets for renewable energy in Africa. It was launched by more than 35 African and European Ministers and Commissioners under the Africa-EU Energy Partnership (AEEP). In this session Speakers will discuss the possibilities on investing to the Emerging Markets.

- **Solar and Storage: Techniques and Systems**

This session consist of Storage of Solar Energy topic. In this session Speakers will discuss the techniques and current smart systems to storage the Solar Energy Power.

Topics of Sessions Day 2

● Future Solar Tecnology & Digitalisation

This session will cover latest Solar Technologies and their implementation to the current Solar Market. Moreover speakers will discuss Digitalisation of Solar Power and how it can increase tranparency and costumer interaction.

● Solar Project Management: Operations and Maintenance

This session will represent the O&M programme. Speakers from provider companies will share their opinion how operation and maintenance management can increase efficiency thourgh in Solar Power Market.

● Ecodesign and Energy Labelling: Regulations and Policies

This Session will represent Eco-Design and how it has influence in Solar Market Products and their qualities. On this session Speakers will discuss how to eco design should be adapted to new innovative products and which standards should be followed.

● SMART Cities

This will cover the SMART Cities technologies, markets and regulations. Speakers will share their opinion about the recommended and trending technologies and innovations and how they can transform cities to energy hubs.

● Solar Power Trade

This will cover the Solar Trade methods, markets and regulations. Speakers will share their opinion about the recommended trade measures.
